

Cost Controller

An enthusiastic and capable individual is required to join our dynamic and expanding company focused on developing and providing world leading products and services to our clients in the global energy industry.

The successful candidate will be tasked with implementing new cost control methods, taking existing processes and financial data requirements into account, and promote improved cost and budgetary discipline across the business.

The Cost Controller will support the business by compiling, analysing and reporting on costs relating to the delivery of our products, services and projects, working to strict schedules, while maintaining accurate records and good communication. The successful candidate will be part of a busy Operations Team and will interface with a number of key departments focused on delivering exceptional service to our clients.

Principal Duties

The Cost Controller will be required to:

- Use data management skills and software expertise to search, analyse and present cost information in relation to operational products, services and projects
- Compile cost data for intercompany billing and recharges
- Perform ongoing financial reporting for projects reporting on estimated and actual costs
- Perform end of project financial reporting and analysis
- Perform cost estimates for product manufacture and delivery
- Assist the sales and commercial teams in performing cost and pricing reviews
- Actively participate in continual process improvement

Required Knowledge & Experience

- Degree qualification or equivalent professional qualification in relevant education
- Minimum three years' experience in a similar cost control role
- Experienced in compiling, analysing and presenting cost and pricing data
- Experienced in operating and interacting with business management database applications
- Highly competent at extracting and compiling data from purchasing, manufacturing and project management database systems, such as ERP
- Excellent analytical skills particularly surrounding the gathering and interpretation of cost data
- Excellent communication and reporting skills
- PC literate, particularly the use of Microsoft Office software, good Excel skills essential
- Ideally experienced in working within a manufacturing, servicing and project-based technology company
- Ideally able to understand bills of materials
- Ideally conversant with C-SAM and/or Access Supply Chain database applications

Location:

Kirkhill Industrial Estate, Dyce, Aberdeen.
