

Electro/Mechanical Industrial Assembler

Founded in 1987, Metrol are global leaders in the innovation, development and operation of wireless down-hole systems, using acoustic, electromagnetic and inductive telemetry.

Metrol's understanding of this technology and its application plays a major part in our success. Our products are already used by energy companies throughout the world during exploration and production, where the data and control provided allows significant advances in efficiency and safety. Metrol's commitment to research and development has ensured that the company stays at the forefront of downhole communications and the successful introduction of a range of new products has resulted in company growth which provides an opportunity for skilled and innovative engineers.

To support our ongoing growth, we are actively recruiting an Electro/Mechanical Industrial Assembler to join our team at our research facility in Blandford Forum, Dorset.

With a family business culture, we aim to create and provide a working environment that promotes from within, encourages training and development and allows and trusts individuals to maintain a work-life balance.

Benefits:

The role comes with a competitive salary and benefits package including:

- Culture that promotes teamwork and empowering individuals to make a difference
- Challenging role with on-the job training. Working as part of an expert team
- 33 days holiday with additional holidays for long service and long service awards
- Hybrid/Flexible working opportunities
- Company Pension contributions
- Private Healthcare and Life Insurance
- Cycle to work and EV Lease schemes

The Role:

The Electro/Mechanical Industrial Assembler will report directly to the Endurance Battery Workshop Supervisor.

The Electro/Mechanical Industrial Assembler will support the business by effectively operating in a production cell to build medium and high-volume subassemblies. Complete finished assemblies to Metrol standards through manufacture, inspection and test.

Principal Duties & Responsibilities:

The Electro/Mechanical Industrial Assembler will be required to:

- Issue and complete Work Orders ensuring that stock accuracy is maintained at all times.
- Work to Assembly Drawings and Procedures at all times.
- Manufacture to a high standard with attention to detail.
- Set up and operate production machinery competently and safely.
- Carry out simple mechanical and electrical tests of subassemblies and finished product.
- Pack and Ship finished assemblies to the end user.
- Manual Handling in the production and stores area, with the assistance of pallet trucks and stacker for trained team members.
- Actively participate in continual process improvement
- Attend training courses as requested by the company
- Maintain a high standard of personal safety in the workplace observing all company QHSE requirements and obligations
- Any other duties that may reasonably be requested by the company

Required Knowledge & Experience:

The Electro/Mechanical Industrial Assembler will require the following knowledge & experience:

- Handling small, high value, components in high volume in an engineering environment
- Ability to interpret technical drawings
- Ability to follow documented processes
- Experience within an electronic/mechanical manufacturing environment and techniques
- Attention to detail and working within a team to produce quality of workmanship in the timescales required
- Team player with good written, verbal, and interpersonal communication skills
- Collating and presenting production and test data

Desirable Knowledge & Experience:

It is advantageous for the Electro/Mechanical Industrial Assembler to be proficient with standard computer applications, e.g. MS Word, Outlook etc.

Location: Blandford Forum, Dorset
