

Mechanical Workshop QC Inspector

Founded in 1987, Metrol are global leaders in the innovation, development and operation of wireless down-hole systems, using acoustic, electromagnetic and inductive telemetry.

Metrol's understanding of this technology and its application plays a major part in our success. Our products are already used by energy companies throughout the world during exploration and production, where the data and control provided allows significant advances in efficiency and safety. Metrol's commitment to research and development has ensured that the company stays at the forefront of downhole communications and the successful introduction of a range of new products has resulted in company growth which provides an opportunity for skilled and innovative engineers.

We are located in the Kirkhill Industrial Estate in Dyce, but operations are global, and we have offices in Dubai, the United States and other worldwide locations.

With a family business culture, we aim to create and provide a working environment that promotes from within, encourages training and development and allows and trusts individuals to maintain a work-life balance.

Benefits:

The role comes with a competitive salary and benefits package including:

- Culture that promotes teamwork and empowering individuals to make a difference
- Challenging role with on-the-job training, working as part of an expert team
- 33 days holiday with additional holidays for long service and long service awards
- Company Pension contributions
- Private Healthcare and Life Insurance
- Cycle to work scheme

The Role:

As we enter a period of growth, we are actively recruiting Mechanical Workshop QC Inspector. This is a full-time role working 37.5 hours per week and is site-based.

Main Duties:

- Inspect parts and assemblies with reference to mechanical drawings, assembly procedures and assembly check lists as appropriate at various stages of assembly and redress
- Witness function and qualification tests
- Inspect assembly documentation and certification to ensure they are complete, relevant and accurate
- Inspect for and assess potential wear and damage to components and assemblies, for example through dimensional and visual checks
- Compile inspection reports and maintain accurate inspection records
- Where required, and in compliance with company Quality Assurance procedures, action concession requests and non-conformance reports in relation to mechanical product inspections
- Co-ordinate Client / Customer onsite Third-party Inspection
- Review / sign off inspection packages.
- Control & maintain calibration records of workshop equipment (Gauges, Hoses, Transducers, Tiny temps etc.)

Required Skills & Experience:

Our Mechanical Workshop QC Inspector will require the following knowledge and/or experience:

- QC inspection processes & procedures.
- Five years of experience as a Mechanical QC Inspector preferred.
- Working knowledge and experience of oilfield downhole electro-mechanical tools preferred.
- Ideally experienced in operating database systems
- Excellent communication skills.
- Highly organised with an eye for detail.
- PC literate, in particular the use of Quality software and Microsoft Office.
- Excellent ability interpreting engineering drawings and Bills of Material.
- Ideally qualified to NC level in a relevant engineering discipline, with secondary education including English and Maths at Grade C or above as a minimum.

Location:

Our Main Office is in the Kirkhill Industrial estate in Dyce, Aberdeen. This role may require occasional periods of travel to locations worldwide.
