

Production Technician

Founded in 1987, Metrol are global leaders in the innovation, development and operation of wireless down-hole systems, using acoustic, electromagnetic and inductive telemetry.

Metrol's understanding of this technology and its application plays a major part in our success. Our products are already used by energy companies throughout the world during exploration and production, where the data and control provided allows significant advances in efficiency and safety. Metrol's commitment to research and development has ensured that the company stays at the forefront of downhole communications and the successful introduction of a range of new products has resulted in company growth which provides an opportunity for skilled and innovative engineers.

We are located in the Kirkhill Industrial Estate in Dyce, but operations are global, and we have offices in Dubai, the United States and other worldwide locations.

With a family business culture, we aim to create and provide a working environment that promotes from within, encourages training and development and allows and trusts individuals to maintain a work-life balance.

Benefits:

The role comes with a competitive salary and benefits package including:

- Culture that promotes teamwork and empowering individuals to make a difference
- Challenging role with on-the-job training, working as part of an expert team
- 33 days holiday with additional holidays for long service and long service awards
- Company Pension contributions
- Private Healthcare and Life Insurance
- Cycle to work scheme

The Role:

Working as part of the Electronics team, the Production Technician will be involved in the assembly, test, and servicing of Metrol products and equipment.

Main Duties:

- Assemble, service, test and calibrate Metrol products and associated equipment in accordance with company procedures.
- Perform tasks relating to the mobilisation and demobilisation of products and equipment working to strict deadlines.
- Maintain accurate build and service records.
- Maintain work areas to a high standard and promote good housekeeping.
- Actively participate in continual process improvement.
- Attend training courses as requested by the company.
- Maintain a high standard of personal safety in the workplace observing all company health and safety requirements.
- Any other duties that may reasonably be requested by the company.

Required Skills & Experience:

- Previous experience assembling and/or servicing electro-mechanical equipment.
- Experience working with high pressure test systems, cable splicing and testing, hydro acoustic systems and lithium batteries advantageous.
- PC literate.

Location:

Our Main Office and Workshops are in the Kirkhill Industrial estate in Dyce, Aberdeen. Due to its nature, this will be a site based role with possible requirement to visit and work at other locations.
