

R&D Project Manager

Founded in 1987, Metrol are global leaders in the innovation, development and operation of wireless down-hole systems.

Our main office is located in the Kirkhill Industrial Estate in Dyce, but operations are global, and we have offices in Dubai, the United States and other worldwide locations.

We deliver excellence in innovation and performance by caring about our relationships – both with our team and our clients.

With a family business culture, we aim to create and provide a working environment that promotes from within, encourages training and development and allows and trusts individuals to maintain a work-life balance.

Benefits:

The role comes with a competitive salary and benefits package including:

- Culture that promotes teamwork and empowering individuals to make a difference
- Challenging, but rewarding role with on-the job training, working as part of an expert team
- Additional holidays for long service
- Hybrid/Flexible working opportunities
- Company Pension contributions
- Private Healthcare and Life Insurance
- Cycle to work scheme

The Role:

To support our expanding R&D team, we are looking to recruit an R&D Project Manager.

Main Duties:

The R&D Project Manager will be required to:

- Track progress and costs on key projects as identified by the R&D Manager.
- Maintain the existing project management system for R&D projects.
- In consultation with the R&D Manager and Project Engineers, develop and expand Metrol's R&D project management system in line with API Q1.
- Collaborate with Project Engineers to ensure that the project management system is being applied and operated correctly on qualifying projects.
- Capture requirements, write specifications and work with all the technical disciplines to develop project timelines and deliver and report on these.
- Collate R&D Projects costs and report on these.

Required Skills & Experience:

Our R&D Project Manager will require the following knowledge and/or experience:

- Ideally at least five years' experience in a project management
- A good awareness of the processes of running offshore tools.
- Good verbal and written communication skills.
- Good delegation skills.
- Proficiency with standard computer applications.
- Strong analytical and problem-solving skills.
- Experience working on Software and Electro-Mechanical development projects.
- Experience with developing SharePoint and other cloud-based solutions.
- Appropriate degree and/or significant industry experience.

Location:

Our Main Office is in the Kirkhill Industrial estate in Dyce, Aberdeen. This role may require Occasional periods of travel to locations worldwide.
